Zhenming Z

My name is Zhenming Zhang. I'm taking this class because of my major requirement. I also very interested in all kind of graphics software, such as Photoshop, Adobe Illustrator, and Adobe Animator. In this class, I can create my own style of design.

*In my raster project, I created some fantasy
characters, but obviously this is the wrong decision. But
this has brought me a good experience.*

RASTER PROJECT

*For my vector project, I really working hard to
create the characters I want. I also set up a story
for my characters because I know that the next project
is animation. However, I really like to use Adobe
Illustrator.*

VECTOR PROJECT

In my final motion project, I spend the most time to do, even if I already have my own story. Every layer, every action, time control and a voice arrangement has brought me a big challenge. Fortunately, I am still very satisfied with the final work.
